5 million+ students have benefited from our community schools model in the U.S.

50% of Children's Aid families are estimated to be food insecure. Between April 2020–2021, Children's Aid distributed 73,707 meals and 160,000+ food packages.

All children have limitless potential. Children's Aid's 100+ programs across 40+ sites in New York City ensure 50,000 children and their families learn, grow, and lead.

Make Your Own Sundial

Materials Needed:

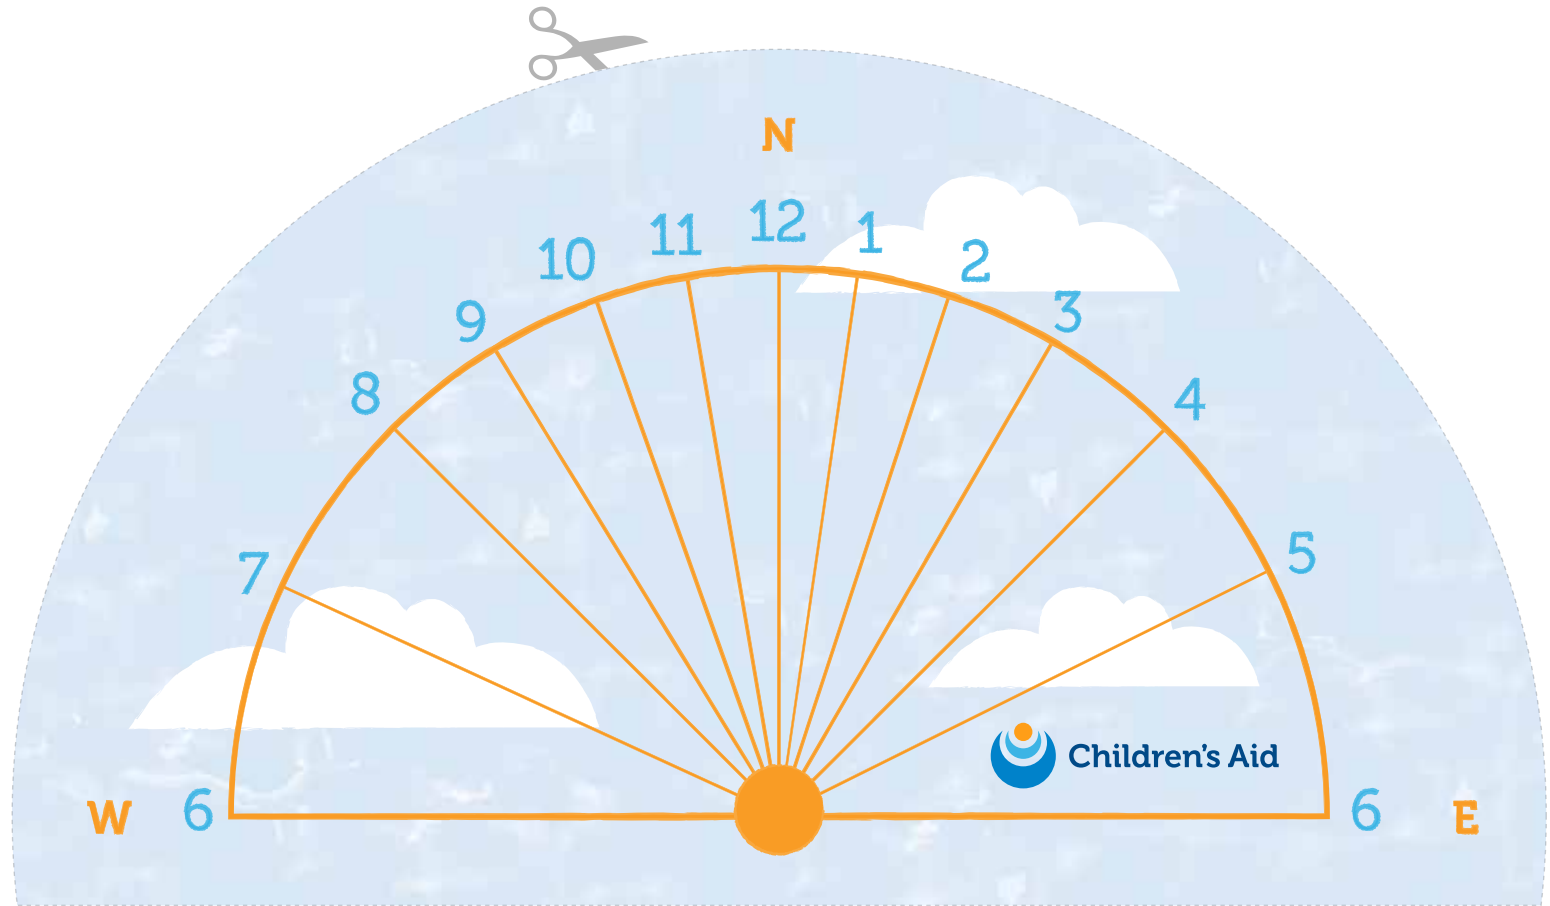

- Paper plate
- Glue stick
- Bendy straw
- Compass
- Pair of scissors
- Roll of tape
- Sharpened pencil

Instructions

1. Cut out the sundial and glue it to a paper plate.
2. Use the pencil to poke a hole through the center of the paper plate.
3. Push the straw through the hole, and tape the short end underneath to hold it in place.
4. On a sunny day, put your sundial outside at noon and place it on a flat surface.
5. Using the compass, point the sundial north and tilt the straw in the same direction (north) so that it casts a longer shadow.
6. As the sun changes relative positions over the course of the day, the straw's shadows change as well, thus reflecting the change in time.

Tip: If you are in the Southern Hemisphere, anywhere the instructions read "north", replace it with "south"
